Subject Index for Volume 105

Pages preceded by S are from the Environmental Health Perspectives Supplements

A

abasic sites, S931–S934
acetaminophen, reproductive toxicity, S267–S268
acetylation, aromatic amine as a biomarker, S763–S766
acid aerosols, 826–834. *See also* air pollution
acrylamide, reproductive toxicity, S259–S260
activator protein, role in asbestos toxicity, S1127–S1130
aerobic/anaerobic metabolism, role in bioremediation, S15
aflatoxin
  biomarkers of exposure, 392–397
  and hepatocellular carcinoma, S157
  inhibition of carcinogenesis, S967–S968
Africa, smoking in, 180
age
  and breast cancer risk, S583–S585
  and heat stress, 726–733
  and lead retention, 412–417
  role in cancer, S865–S866
  and susceptibility to metals, S818
agricultural chemicals, results of animal testing, 1196–1203
agriculture
  exposure of children to pesticides, 1344–1353
  health effects of burning, 980–985
  in the Pacific Islands, 915
air pollution. *See also names of specific air pollutants*
  airports as source of, 172, 1302–1303
  and asthma, 216–222
  and cardiorespiratory disease, 614–620
  contact allergens in, 986–992
  effects on children, 964–970
  epidemiology of health effects, 1078–1083
  and low birth weight, 514–520
  particulate
    and asthma, 430–435, 980–985
    cardiopulmonary injury, S1053–S1060
    generation of reactive oxygen species, S1285–S1289
    and infant mortality, 608–612
    inflammation caused by, S1279–S1283
    interaction with alveolar macrophages, S1191–S1195
    role of reactive oxygen species in response to, S1301–S1307
  pigeons as indicators of, 322–330
  sentinels of indoor, 1312–1319
  standards, 378–383
  web page on, 371
airports
  as sources of air pollution, 172, 1300–1305
Alaska, gasoline exposures, 850–855
allergens, fungal spores as, 622–635
allergic contact dermatitis
  and carcinogenesis, 940–948
  evaluating compounds that may induce, 986–992
Alternative Fuels Data Center, 577
alveolar breath sampling, to assess trihalomethane exposure, 636–642
Alzheimer's disease, 276
American Conference of Governmental Industrial Hygienists, S105
American Lung Association, 171
American Thoracic Society, 171
9-aminoacridine hydrochloride, reproductive toxicity, S269–S270
ammonia, in ambient air, 826–834
amosite, and lung cancer, 504–508
amphibians
  deformities in frogs, 1046–1047
  development of, S70–S71
androgenization, S69–S70
androgen receptor, disruption, 296–297
androgens, 483
angiosarcoma of liver, S159
Animal and Plant Health Inspection Service, 592
animal models
  alternatives to, 48–50
  aquatic, S24–S27
  of fiber-induced lung cancer, S1337–S1346
  of reproductive cancers, S669–S674
  of respiratory disease, 188–200
  for testing electromagnetic fields, S81–S103
  use in risk assessment, 1196–1203
ankylosing spondylitis, 1172
Antarctica, trace metals in snow, 654–659
anthracyclines, cytotoxicity of, S1459
antibiotics, resistance to, 788
antimicrobial polymers, 290–292
antioxidants, protection against radiation injury by, S1473–S1478
apoptosis
  asbestos induced, S1147–S1152
  effect of potassium ions on, 1290–1291
  silica induced, S1241–S1245
aquatic environments, S21–S35
  effect of hurricanes on, 23–24
  toxins in, 1048
aquatic organisms
  deformities in frogs, 1046–1047
  effect of xenoestrogens, 418–422
  gonadal tumors in, S669–S674
  multixenobiotic resistance, S855–S858
Arctic, contaminant bioaccumulation, 316–321
Arctic Council, 276–277
arsenic
  in drinking water, 1090–1097
  occupational exposure to, 836–842
  quantification of in urine, 650–653
  risk assessment of inorganic, 1060–1067
art materials, safety of, 284–289, 686–688
asbestos
  amosite, chronic inhalation study of, S1223–S1229
  amphibole, iron-chelator treated, S1021–S1030
  cell signaling pathways elicited by, S1121–S1125
  crocidolite
    effect of microwave radiation on, S1041–S1044
    effect on glutathione, S1273–S1277
    induction of apoptosis, S1147–S1152
    and lipid peroxidation, S1127–S1130
    and lung cancer, 504–508
  effect on cellular enzymes, S1325–S1327
  effect on macrophages, S1139–S1142, S1257–S1260
  and lung cancer, 504–508
  and lung cell growth factors, S1165–S1171
  nitric oxide on fibers, S1037–S1040
  proliferation of mesothelial cells, S1205–S1208
  role of heme protein, S1109–S1112
  surface characteristics of chrysotile, S1017–S1018
  transformation of bronchial epithelial cells by, S1085–S1088
  use in developing countries, 1178–1179
asbestosis, S167–S168, S1113–S1119
  localization of transforming growth factors, S1197–S1203
asthma, 534–537
  and air pollution, 216–222
  and cockroach antigens, 1192–1194
  effect of agricultural burning, 980–985
  ethnicity, 376
  indoor risk factors for, 208–214
  and multiple chemical sensitivity, S437–S441
  and outdoor fungal spores, 622–635
  and particulate air pollution, 430–435
  role of plasticizers, 972–978
atomic bomb survivors
  cancer among, S1505–S1509
  life span study, S1519–S1521
atomic testing, 908–909
  in the Marshall Islands, 918–919
α2u–globulin, 898–906
Australia
  protection of natural fauna, 591–592
  Ross River virus, 364–367
autoimmune disease, 333–334
  mad cow disease as an, 1172–1174

automobile emissions, 585
automobiles, alternative, 582–587
AZT, 282

B

Bacillus thuringiensis, 472
basal cell carcinoma, S928–S930
base excision repair, S149
behavior, changes in health-related, 1132–1135
benzo[*a*]pyrene
  DNA adducts induced by, S1089–S1093
  tumors induced by, S1103–S1108
beta agonists, use to treat asthma, 430–435
β_2-microglobulin, 1102, 1103
bioaccumulation, of mercury, S29–S32
bioassays
  dose selection in chronic, 18–20
  use in risk assessment, 1196–1203
biological diversity, and deforestation, 1190
biological exposure indices (BEI), S105–S115
biological monitoring. *See also* biomarkers
  of children for pesticide exposure, 1344–1353
  ethics, S837–S841
  of insecticide applicators, 510–513
biomarkers, S699–S737, S829–S835
  aromatic amine acetylation, S763–S766
  of breast cancer, S559–S564, S593–S599
  of chronic toxicity, S65–S80
  cytochrome P450, S759–S762, S767–S774
  DNA adducts, S823–S827, S907–S912
  of fiber toxicity, S1235–S1240
  growth factors and oncoproteins, S807–S816
  measures of heme synthesis as, S43–S46
  for occupational exposures, S105–S115
  of pesticide exposure, S801–S806
  p53 genes as, S155–S163
  of pregnancy, 862–866
  of xenoestrogen exposure, S647–S654
bioremediation, S5–S20, 1040, 1190–1191
biosolids, 32–36
Biotechnology Industry Organization, 489
birth weight
  and air pollution, 514–520
  effects of hazardous waste on, 856–861
2,2-bis(bromomethyl)-1,3-propanediol, reproductive toxicity, S271–S272
bisphenol A
  bioactivity, 70–76
  in dental sealants, 362
  in food cans, 570–572
  reproductive toxicity, S273–S274
Black Sea, pollution of, 1288–1289, 1291
bladder cancer, mechanisms, S751
bleomycin, S171
blood pressure, of radiation-exposed immigrants, S1524, S1548
bone
  density as a biomarker for breast cancer, S593–S599
  lead in, 224–233, 820–824, 935, 1284
boric acid, reproductive toxicity, S275–S276
bovine spongiform encephalopathy. *See* mad cow disease
brain, asymmetry as a biomarker, 718–725
brain neoplasia, and household pesticides, 1214–1220
BRCA2, 1310–1311
breast cancer, 274–275
  and bone density, S593–S599
  dietary estrogens, S633–S636
  and environmental contaminants, S679–S683, S891–S896, 1222–1227
  epidemiology, S587–S592
  estrogen metabolites, S559–S564, S565–S569, S577–S581, S601–S605, S607–S614
  gene mutations, S899
  genetic polymorphism, S919–S926
  hormonal risk factors, S583–S585, 994–997
  and kidney carcinogenesis, S565–S569
  risk, 476
  role of dyes, S625–S632
  and xenoestrogens, S675–S678
breast milk, pesticide contaminants in, 1250–1254
Bridging Education, Science, and Technology, 176–177
bromodichloromethane, exposure during swimming, 636–642
bromoform, reproductive toxicity, S277–S278
bronchial epithelial cells, transformation by asbestos, S1085–S1088
brownfields, 693, 696–701
Bunch v. Dow Chemical, 1308

C

cadmium
  biological monitoring, S705–S706
  bioremediation using yeast, 1040
  oxidative cellular damage by, 712–716
  in soil, 234–238
  from sunflower seeds, 1098–1104
  susceptibility to, S819
caffeine
  discrimination test, S509–S513
  reproductive toxicity, S279–S282
calcium, effect on lead absorption, 1284–1287
Canada, child health in, 704
cancer
  activism, S685–S687
  analysis of causes, S865–S873
  childhood, S1531, 1069–1077
  detection, S935–S939
  prevention, S941–S944, S945–S954
  radiation induced, 12, 52–57, 266–267, 566–569, S883–S889, S1505–S1509, S1511–S1517
  and radiofrequency fields, S1565–S1568
  role of diet, S989–S992
  susceptibility and ethnicity, S897–S900
  therapy by monoterpenes, S977–S979
Cancer Genome Anatomy Project, 1043
carbaryl, measurements of, 510–513
carbon monoxide, reducing emissions of, 1042–1043
carcinogenesis
  animal models for testing electromagnetic fields, S81–S103
  of compounds that cause allergic contact dermatitis, 940–948
  and free radicals, S875–S882
  hormonal, 483–486
  inhibition by polyphenols, S971–S976
  mechanisms, S749–S754
carcinogenicity
  biomarkers of, S67
  comparison of methods to predict, 466–467
  of mineral particles, S1003–S1011
  use of transgenic mice to determine, 163
carcinogens, classifying, 1040–1041
Caribbean, lead exposure in, 398–405
carisoprodol, reproductive toxicity, S283–S284
Carter, Nick, 574, 575
case–control studies, 1177
catalysis, in industrial processes, S55–S59
cell signaling, after asbestos exposure, S1121–S1125, S1131–S1137
Center for Safety in the Arts, 277
cesium, susceptibility to, S820
chelation
  of amphibole asbestos, S1021–S1030
  therapy of lead-poisoned children, 1084–1088
Chemical Industry Institute of Toxicology, 1292
chemically activated luciferase gene expression, 1176–1177
Chemical Manufacturers Association, 39, 360, 1292
chemical mixtures
  hormonal activity of, 896
  reproductive toxicity, S369–S376
chemistry, green, 264
chemoprevention, of cancer, S941–S944, S955–S963, S965–S970
Chernobyl nuclear accident, S1385–S1387, S1385–S1391, S1523–S1527, S1533–S1537
  effects in children, S1479–S1481, S1497–S1498, S1529–S1532
  effects in cleanup workers, S1445–S1449, S1479–S1481, S1619
  mental health of people affected by, S1545–S1550, S1551–S1556
  thyroid effects, S1491–S1496, S1497–S1498
    cancer, S1483–S1486, S1487–S1490

children
biomonitoring for exposure to pesticides, 1344–1353
cancer and pesticides, 1069–1077, 1214–1220
environmental health, 370–371, 564–565, 702–704
ingestion of soil, 1354–1358
lead exposure, 66–68, 406–411, 1084–1088
auditory effects, 522–526
from diet, 1334–1342
effects on intelligence, 956–962
from soil, 950–954
nitrogen dioxide exposure, 964–970
radiation exposure, S1529–S1532
and leukemia, S1499–S1504
of parents, S1479–S1481
from radon, S1411–S1416
thyroid cancer from, S1487–S1490, S1491–S1496
Children's Lead Assessment and Reduction Study, 793
China, smoking in, 179
chlordane, phasing out in Mexico, 790–791
chloroform
exposure during swimming, 636–642
reproductive toxicity, S285–S286
chloronitrobenzene, reproductive toxicity, S287–S290
1-chloro-2-propanol, reproductive toxicity, S291–S292
chloroprene, 282
cholera, 798
chromium
in drinking water, 1090–1097
role of reactive oxygen species in carcinogenicity of, S170–S171
chromosome aberrations, S830
radiation induced, S1441–S1443, S1499–S1504
and radiosensitivity, S1437–S1439, S1467–S1471
scoring, S1428–S1429
chromosomes, artificial, 576
chromosome transfer, microcell-mediated, 908
chromosome translocations, use in dosimetry, S1433–S1436
cigarette smoke. *See* tobacco smoke
clastogenic factor, among radiation-exposed immigrants, S1525
clays, inhibition of silica activity by, S1016
Clean Air Act, 378
climate
and health in the Pacific Islands, 915–916
relationship with mortality, 84–93
climate change, and deforestation, 1188
cloning, 1310–1311
coal
chronic inhalation of dust, S1231–S1234
and occupational arsenic exposure, 836–842
cobalt sulfate, 282
cockroaches, and asthma, 1192–1194
cognitive function, and multiple chemical sensitivity, S495–S503
coliform bacteria, in drinking water, 1290
colorectal neoplasia, and phenolphthalein, 1210–1212
computer-assisted structure evaluation, S665–S666, 986–992
conditioning, and multiple chemical sensitivity, S521–S526
contaminant transport, in groundwater, S127–S143
copper arsenate, chromated, 692–693
corn borers, 472
cotinine, concentrations in newborns, 202–206
Cox, Paul, 575
cresol, reproductive toxicity, S293–S296
cyclooxygenase enzymes, 28–29
cytochrome P450, 479
as a biomarker, S759–S762, S767–S774
cytokines, S1304
effect of particulates on, S1179–S1182
and inflammation, S1159–S1164, S1265–S1271
protection against ionizing radiation, S1463–S1465
Czech Republic, lead exposure in children, 406–411

D

dams, 1050–1055
DDE, 14
in aquatic environments, 1030–1032
metabolites in human tissues, 644–649
DDT, 14
in aquatic environments, 1030–1032
biomonitoring of workers exposed to, 98–101
phasing out in Mexico, 790–791
deforestation, 1179, 1186–1191
dementia, 275–276
de novo mutations, in Chernobyl cleanup workers and their children, S1479–S1481
developing countries, 16–17
use of asbestos in, 1178–1179
diazepam, reproductive toxicity, S297–S298
dibromochloropropane
in aquatic environments, 1030–1031
reproductive toxicity, S299–S300
diesel emissions, S170, S1231–S1234
diet
and cancer, S633–S636, S866, S893–S894, S982, S989–S992
effect of calcium on lead absorption, 1284–1287
effect on carcinogen metabolism, S959
health advisories, 1360–1365
as a source cadmium, 1098–1104
as source of mercury, 424–429
diethylene glycols, reproductive toxicity, S207–S208, S209–S210
diethylhexyl phthalate
reproductive toxicity, S241–S244
role in asthma, 972–978
diethylphthalate, reproductive toxicity, S245–S246
diethylstilbestrol, 486
reproductive toxicity, S301–S304
1,2-dihydroxy-9,10-anthraquinone, S1459–S1462
2,3-dimercaptopropanesulfonate, 478
N,N-dimethylformamide, reproductive toxicity, S305–S307
di-*n*-butylphthalate, reproductive toxicity, S247–S250, 102–107
Dingit, Loir Botor, 575
di-*n*-hexylphthalate, reproductive toxicity, S251–S252
di-*n*-octylphthalate, reproductive toxicity, S253–S254
di-*n*-pentylphthalate, reproductive toxicity, S255–S256
di-*n*-propylphthalate, reproductive toxicity, S257–S258
dioxin-responsive element, 1177
dioxins
biomarkers of toxicity, 718–725, 1176–1177
carcinogenicity of, 576–577
contamination in Russia, 473
effect on heme synthesis, S41–S42
in incinerator fly ash, 1326–1332
promotion of endometriosis, 750–755
reproductive toxicity, 162–163
disease, global predictions, 184–186
dithiolethiones, inhibition of carcinogenesis by, S967–S968
DNA adducts, S823–S827, S907–S912
induced by nickel, 744–748
induced by particles, S1291–S1296
role of neutrophils in benzo[*a*]pyrene induced, S1089–S1093
DNA damage, 1034–1039. *See also* chromosome aberrations
-inducible genes, S913–S917
radiation induced, S982, S1459–S1462
DNA repair, S927–S930
abasic sites, S931–S934
in cancer, S775–S780
mechanisms, S145–S153
dose–response relationships, S117–S122
of fibers, S1253–S1256, S1347–S1356
dose selection, in bioassays, 18–20
dosimetry, S1393, S1397–1400
personal performance test, S1417–S1421
radiation, S1393, S1397–S1400, S1403–S1409, S1505–S1509
use of chromosome translocations, S1433–S1436
use of fluorescence *in situ* hybridization, S1427–S1432
use of semiconductors for internal, S1423–S1426
drinking water
arsenic in, 1060–1067, 1090–1097
contamination, 1290
disinfection by-products, 108–109
fluoridation of, 1176
dusts, surface reactivity, S1013–S1020

E

ecosystems, susceptibility to hazardous chemicals, S843–S848, S849–S854
education, community programs, 278–281
eggshell protein, as biomarker for xenoestrogens, 418–422
EHPnet
  Alternative Fuels Data Center, 577
